

## BARIATRICS 4 DIABETES

### Bariatric Weight-Loss Surgery is helping erase type 2 diabetes

The day after the  
surgery I checked  
my blood sugar —  
and it was normal.

Linda

Many patients are finding that bariatric weight-loss surgery is having a positive effect on type 2 diabetes. Read their stories at

[Bariatrics4Diabetes.com](http://Bariatrics4Diabetes.com)

- **77% of patients resolved their diabetes** — Type 2 diabetes disappeared or treatment was no longer necessary
- **92% reduction in deaths** — From type 2 diabetes-related causes
- **Rapid results** — Type 2 diabetes disappeared almost immediately or, for others, blood sugar levels fell soon after surgery
- **Reduced health risks** — Reduces risks of serious type 2 diabetes complications including blindness and limb amputation
